EXAMINER'S AMENDMENT *Amdt/PRHP*

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney Robert C. Colwell on 01/19/2005.

The application has been amended as follows:

- On page 2 of the specification, on line 8, after "Serial number 09/855,765," inserted --now is U.S. Patent number 6,697,547--;
- On page 8 of the specification, on line 8, after " U.S. Patent Application Serial No." inserted --10/078,057--.

REASON FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, because none of the references in alone or in combination discloses:

An optical switch apparatus comprising:

- at least two independent control elements for controlling optical loss in a portion of said switch apparatus, said at least two independent control elements located in an optical path of said optical switch apparatus;

- an arrangement of said at least two independent control elements such that minimum optical loss through the portion of said switch apparatus in which they are located may be obtained;

wherein said at least two independent control elements may be independently tuned to effect said control of optical loss, including timed to said arrangement for obtaining minimum optical loss; and

wherein at least one of said at least two control elements is selectively detuned to said arrangement for obtaining minimum optical loss such that the resulting optical loss is substantially constant regardless of application of typical mechanical vibration to the optical switch apparatus, as discloses in claims 1, and 16.

The underlined limitations are critically, since the apparatus and the method are improved: obtaining minimum optical loss for equalization of optical power between channels of fiber optic transmission system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
